

## Protection Camp Update 17<sup>th</sup> Oct:

We have a plan, and we need your help! Over the next few weekends in October and November we're planning to doorknock the entire town of Gloucester and survey residents.

We'll also take peaceful action and have fun along the way. You're welcome at all the activities or simply one of them for an hour or two.

Doorknocking is an effective way to engage and inform Gloucester residents. We'll have a simple survey to ask their views. Never door knocked before? We'll provide a doorknocking kit, Q&A, a brief training and an experience buddy to doorknock with.

Community actions are a key way to build the visibility of community opposition to CSG fracking. The Gloucester community has been holding a community vigil and regular walks from town to the fracking site. There are lots of different roles to play - please consider coming along!

### What's happening on the weekends?
