

FILM AND INFORMATION EVENING: COAL SEAM GAS IN THE GLOUCESTER VALLEY

What: Film screening and discussion about coal seam gas.

When: 6:30pm for 7pm start, Wednesday 10 September

Where: Gloucester Senior Citizens Centre, Hume St, Gloucester

**JOIN US FOR A FILM SCREENING
AND DISCUSSION**

Groundswell Gloucester are holding a short film and presentation evening on Wednesday 10th September to highlight the concerns of many regarding the issues surrounding the coal seam gas industry.

We understand there are many in the community who are unsure of the facts and science involved with the fracking of CSG wells and what an industrialised gasfield means. 330 CSG wells are planned for the Gloucester valley. We have serious concerns regarding immediate and future health impacts, degradation to essential water resources and land usage.

Groundswell Gloucester is a voluntary group of concerned community members who wish to explain why we are protecting the future and why the worldwide uprising against coal seam gas is not just a Gloucester issue. The latest country to ban fracking is Germany, with the German Environment Minister stating that "Protecting drinking water and health has the highest value for us".

The health of our people and the environment we all rely on is just too serious to compromise. Why are so many people concerned about Gloucester?
